

## Intermediate Architectural Technologist

### THE ROLE

We are looking for an Intermediate architectural technologist to join our team. We are a growing, mid-sized firm located in Calgary with a focus on multi-residential projects situated throughout Alberta, BC and working our way into other provinces.

**THE COMPANY:** FAAS Architecture is a dynamic, fast paced design firm. Office culture is as valuable to us as excellent design and technical documentation that translates into great buildings.

### KEY QUALITIES

- Excel at AutoCAD (modeling, detailing and family creation) for the production of technical drawings, Revit an asset.
- Excellent communication and interpersonal skills, allowing you to collaborate and interact in a team-oriented environment.
- Team player who is open to collaboration and gaining experience from our team of professionals.
- Engage in creative and critical thought.
- Detail oriented, highly motivated and deadline driven.
- Passionate about the technical side of architecture.
- Mastery of building codes and standards.
- Ability to manage multiple projects with strict deadlines.
- Desire to learn and adapt to a dynamic work environment.
- Enthusiastic and dedicated.

### THE RESPONSIBILITIES

- Preparation of construction drawings, including conceiving building envelope architectural details. Has the ability to develop 70% of construction drawing requirements independently and co-ordinates with senior staff and consultants on remainder of project requirements.
- Coordination of architectural documents (drawings, specifications, and CA documentation).
- Work and collaborate with all consulting teams to produce fully coordinated technical construction documents.
- Research of materials and products.
- Prepare by-law and building code analysis.
- Proficiency in drawing; provide Revit and AutoCAD support in all areas of projects and for all levels of detailing.
- Attends project meetings as directed by the Project Manager.
- Applies sound principles and best practices in developing a design through sketches, physical models,

electronic models, diagrams, massing studies, and other visual formats to express the design intent and communicate to project team, client, and building user groups.

- Assist in the performance and execution of office Quality Control procedures.
- Take mentorship and guidance from more experienced production team members.
- Excellent verbal and written communication skills.
- Strong attention to detail; ability to create clear, well laid-out drawings.
- Strong organizational skills.
- Provides shop drawing review.
- Able to interpret and respond to comments provided by the Authority having jurisdiction.
- Oversee work of junior technical staff.

### **WHAT'S REQUIRED**

The ideal candidate will have the following qualifications:

- Architectural Technology Diploma/Certification.
- Minimum 5 years of experience working as an intermediate with Job Captain role experience on various project types in Canada.
- Excellent knowledge of AutoCAD software.
- Experience with multi-use, multi-unit residential, industrial, and commercial projects.
- Construction site experience would be an asset.
- Some proficiency in Revit an asset.

### **WHAT YOU GET IN RETURN**

- Opportunity to work for a professionally managed company that operates with integrity, a collaborative and supportive work culture.
- Work alongside a dynamic team of talented professionals.
- Be involved in both small and large scale, complex projects; receive support for furthering education/professional skills.
- Competitive compensation package.
- Paid holiday closure between Christmas and New Years.
- Opportunities for professional development.
- Contribute to sustainable design and community projects.
- Social Activities throughout the year.

### **HOW TO APPLY**

If you feel this position could be the right fit for you, please apply as soon as possible and submit your resume to **info@faasarch.com**. We thank you for your application, however, only successful applicants who meet the requirements of the position will be contacted.
